

Quick Reference Guide

How to use the search function

The global search option within NEPT is available on all pages and windows. The below example will demonstrate how to use the search function for patients being transported to **or** from a 'Facility' or 'Nursing Home' making sure QAS arrives at the right location to collect or drop-off the patient.

1. Select either the Facility or Nursing Home option.

Select the magnifying glass beside the 'To/From facility/nursing home' data field. * form * form
